

Multicare

Critical Care Bed

Multicare turn for the better

100%
help for staff and patient

Benefits of Multicare

- Less pulmonary complications thanks to automatic lateral therapy (ALT®)
- Quicker recovery thanks to the Mobi-Lift®
- Reduced falls thanks to the siderail concept, bed exit alarm (BEA) and i-Brake

Patient

- Less physical strain and easier patient handling due to the lateral tilt
- Safer and quicker transport thanks to the i-Drive Power
- Lowered necessary repositioning due to the Ergoframe®

Staff

- Reduction of extra cost for ventilator associated pneumonia (VAP), falls, infections and pressure ulcers
- Saving staff time for the qualified jobs
- Optimized treatment economy due to shortened length of stay

Management

Multicare is staff friendly

PLATFORM BASED LATERAL TILT

- An aid for handling the patient with minimum effort.
- Routine nursing activities such as washing, re-positioning, toilet and dressing easily and ergonomically.
- Simply turn your patient on side using the bed lateral tilt.

BACK INJURIES

Ergonomically correct

The Multicare bed with the lateral tilt.

Ergonomically incorrect

52% of nurses complain of chronic back pain.

A bed without the lateral tilt. A huge risk of back injury in the lumbar area.

THE LATERAL TILT

Can minimize the effort required from ICU staff and optimize working conditions during other activities such as mobilization and transfer from the bed to a stretcher.

QUICKER RECOVERY AND HIGHER COMFORT

LESS BACK INJURIES AND PHYSICAL STRAIN

REDUCED EXTRA COSTS OF STAFF OCCUPATIONAL INJURIES AND THE EFFECTS OF THE IMMOBILITY SYNDROME

Multicare is staff friendly

MOBI-LIFT®

- Helps get the patients out of bed safely with reduced staff effort.
- Unique LINET solution combines support handle with egress height adjustment.
- Supports the active participation of the patient.
- Helps to minimize the immobility syndrome by early mobilization.

I-DRIVE POWER

- Motorized patient transport with minimum manpower.
- A unique Safety Sense™ feature avoids the risk of self-activation, unintentional activation or misuse.
- The intelligent accelerator optimizes the drive speed in different drive situations.

Absolutely safe

Safety is a key parameter for the Multicare. All the bed's functions are set so the patient can not just feel but really be as safe as possible.

SAFEPlus
CONCEPT

MULTI PROTECT SIDERAILS

Progressive siderails with the safe gaps concept, siderail sensors detecting the down position and exceptional height provide excellent protection against falls.

I-BRAKE

Automatic brake prevents uncontrolled movement and falls caused by leaning on an unbraked bed.

MULTI ZONE BED EXIT ALARM

The suitable audible alert regime can be selected with respect to actual patient fall risk. This feature can help staff to control the fall risk permanently and to react in time accordingly.

NURSE CALL

Nurse call is always at hand to prevent dangerous situations or to call staff for common assistance.

Ready to prevent

AUTOMATIC LATERAL THERAPY (ALT®)

Automatic Lateral Therapy is a platform based lateral tilt individually programmed in cycles to improve lung drainage and prevent VAP 1,2.

ORTHOPNOEIC CHAIR

The Orthopnoeic chair position helps to maximise respiratory function and enhances patient comfort.

EASIER LUNG DRAINAGE AND LESS STRENUOUS MANUAL PATIENT HANDLING

LESS PULMONARY COMPLICATIONS THANKS TO AUTOMATIC LATERAL THERAPY (ALT®) AND ORTHOPNOEIC CHAIR

REDUCTION OF EXTRA COST FOR VAP, ARDS OR COPD, SHORTENING THE LENGTH OF STAY

Ulcer prevention

PRESSURE ULCER PREVENTION

Multicare open architecture allows using various mattress systems for the prevention or healing of pressure ulcers according to the needs of the patient.

Virtuoso with zero pressure and 3-cell technology.

OptiCare with integrated design.

THE ERGOFRAME®

System increases patient comfort and ergonomics when lying on the bed and minimizes lung and abdominal area compression.

THE LATERAL TILT

Can assist nurses in regular preventive patient repositioning. This basic preventive treatment can be done effectively with reduced strain and risk of back injury.

Multicare is practical

MULTIBOARD

Easily accessible control panel with intuitive user interface is oriented to indicate the 30 degrees HOB (Head of Bed) position.

I-DRIVE

The i-Drive Retractable 5th castor helps to reduce the effort required by staff to drive and steer the bed.

LATERAL X-RAY CASSETTE TRAY

The lateral X-ray cassette holder enables safe imaging of the chest without needing to reposition the patient on the bed.

SCALES

The Advanced Weighing System integrated into the Multicare bed is capable of indicating the exact weight of the patient in most bed positions. This yields not only the current value of the patient's weight, but also provides valuable information about changes over time.

FOOT CONTROLS

Handsfree comfortable adjustment of the height and lateral tilt.

ILLUMINATED PATIENT KEYBOARDS

For the patient's better orientation at night.

Infection control

PERFECT DISINFECTION

The column construction, flat and seamless surfaces make easy and complete decontamination possible.

SANITIZED® ANTIMICROBIAL TREATMENT

Sanitized® treatment of the most commonly touched surfaces on the Multicare bed help to reduce the growth and activity of many microbes. The natural silver ion activity is safe for patient contact and will last the lifespan of the bed. This treatment compliments the standard hygiene features of the LINET Multicare bed with no additional cost.

Sanitized®

- Protects the polymer against microbial and fungal deterioration.
- Is safe for patient contact.
- Wash resistant and long lasting.
- Utilizes a natural active silver ion.
- Compliments the other hygiene features of the bed.
- Is a standard feature.

Early Mobilization with LINET

Use the LINET INTENSIVE CARE SOLUTION to influence the length of stay in your unit

Integrating the advanced features of the LINET bed frame into the Intensive and Critical Care Environment can help simplify the Early Mobilization program. All these features are standard to the LINET bed frame, which can improve utilization and compliance.

Level 1

The frame-based Lateral Tilt is a unique LINET feature which can help accelerate recovery of critical care patients.

Micro-shifting technology and Automatic Lateral Therapy can assist in reducing the complications like the formation of pressure ulcers and higher risk of VAP.

Level 2

Immobile ICU patients can experience trunk or core weakness, reducing their ability to support themselves in an upright position. The full chair and reverse Trendelenburg positions help with muscle strengthening exercises as well as hemodynamic and orthostatic training. One-button function on LINET beds.

Level 3

While sitting on the edge of the bed, in addition to touching the floor with his/her feet, the patient has two fixed points – the siderail and Mobi-Lift®.

The Mobi-Lift® sets the bed to an ideal position and the ergonomic siderails create a stable support.

Level 4

The Mobi-Lift® together with the siderails are unique LINET features which could improve the safety of the entire Early Mobilization Program in your intensive care department.

Moving the patient to the Sella chair or other bed becomes a much simpler process.

Basic beds parameters

CERTIFICATES

LINET is a company certified under international standards and quality systems: ISO 9001, ISO 13485, ISO 14001, MDSAP.

Products are manufactured in accordance with the European standards for medical technology and hospital beds: EN 60601-1, EN 60601-1-2, EN 60601-1-6, EN 60601-2-52, EN ISO 14971, EN 45501, 93/42/EEC, 2014/31/EU, 2011/65/EU.

ELECTRIC PARAMETERS

Power supply	230 V AC, 50 /60 Hz
Maximum input max.	370 VA
Cover against water and dust	IP X4
Type of protection against electrical current	Class I
Level of protection against injury from electrical current	Applied part type B
Electric motor operation mode (load factor)	max. 2 min ON / 18 min OFF

TECHNICAL PARAMETERS

External dimensions	215×105 cm (shortest mattress platform position)
	237×105 cm (longest mattress platform position)
Mattress dimensions	208 × 86 cm
Max. mattress height	23 cm
Height adjustment	44–82 cm
Lateral tilt	±30°
TR/ATR tilt	13°/16°
Weight (basic equipment)	224 kg
Safe working load	250 kg
